

## 10 Most Suitable Sites for Wind Turbines in Santa Barbara County

This map ranks the top 10 sites for potential wind turbine development in Santa Barbara County. 1 is considered the most suitable. Site suitability was determined by various factors, including selecting areas with sufficient wind power, areas that are within 7.5 km of a major road, areas at least 7.5 km away from an airport, areas at least 1 mile away from an urban area or projected urban area, and areas that are not within a hazardous fire zone.
